# Home Inspection Checklist

The following is a checklist of items that the inspector will likely check to ensure. These are items that *could* signal for significant future owner expenses and headaches. When we are looking at a property these are items we should definitely ask an inspector about if we notice them to be an issue.

## **Grounds And Exterior Structure**

- □ Foundation appears in good condition with no significant cracks
- $\Box$  No evidence of leaks from the septic tank
- □ Drainage away from the house with no standing water
- □ Easily accessible crawl spaces to get to plumbing
- □ Exterior walls appear straight with no sagging
- $\Box$  Windows and door frames appear square
- □ Siding appears in good condition with no cracks or damage
- □ Bricks appear undamaged with no cracks in joints
- □ Paint is not flaking or stained
- □ Roof shingles are not missing or damaged
- □ Gutters show no decay and drain properly
- Chimneys appear straight and undamaged
- Detached garage, shed, fence and deck appear in good condition with no rotted wood or evidence of termites

### Basement

- □ No evidence of moisture
- $\hfill\square$  No evidence of water damage to above floor
- □ Sump pump operates properly

## Attic

- $\Box$  No evidence of staining from roof
- □ Structure shows no damage or decay
- $\hfill\square$  Adequate ventilation through soffit vents and end louvers
- □ Insulation is sufficient and installed properly
- □ Electrical splices are contained

#### Bathrooms

- Visible plumbing under sink is in good condition and shows no signs of water damage
- □ Adequate water pressure for hot and cold water at all fixtures
- □ Tub, shower and sinks drain smoothly
- $\Box$  Toilet flushes and fills properly
- □ Toilet is stable, with no rocking or stains at base
- □ No evidence of leaking around base of tub or shower

## Kitchen

- Visible plumbing under sink is in good condition and shows no signs of water damage
- $\Box$  Working exhaust fan vents to outside
- □ Garbage disposal is operational
- □ Water flow to sink is adequate and drains properly
- □ Built-in appliances operate properly

### **Interior Rooms**

- Floors, walls and ceilings appear straight and level without visible stains, cracking or damage
- □ Doors open easily and latch properly when closed
- □ Lights and switches operate properly
- □ Adequate number of electrical outlets in each room
- □ Heating and air conditioning vents in all rooms
- □ Fireplace has no cracking and shows no staining
- □ Fireplace flue has been cleaned and is lined
- □ Smoke detectors and carbon monoxide detectors are working and located properly
- □ Stairway treads and risers are solid

#### **Electrical Systems**

- □ Wiring is in good condition
- □ Service panel has normal capacity with cables attached correctly
- □ Cables are secured and protected
- □ No exposed electrical splices

### **Heating And Cooling Systems**

- □ No gas odor
- □ Air conditioning and heating operate well
- □ Air filters are clean
- $\hfill\square$  Flues have no open seams and slow up to chimney connection
- Cooling unit has no visible rust

## Plumbing

- □ Visible pipes have no damage or evidence of leaks
- $\hfill\square$  Water heater shows no signs of rust
- □ Water pressure falls within accepted range
- □ Hot water temperature does not exceed 125 degrees Fahrenheit

# **Inspection Notes**
